LCA Calculator 6.5 Release Notes

This release includes the following enhancements.

Sphera's new look

LCA Calculator has introduced the new Sphera logo and colors:

Sphera's new look has also been applied to the LCA Calculator Help and release notes.

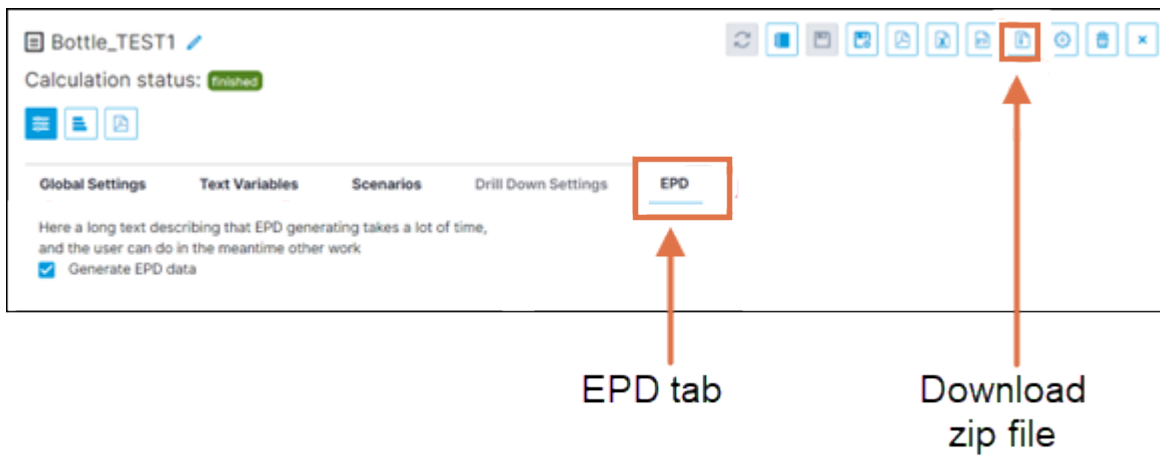

iReport (Calculation) Engine

The LCA Calculator Engine has been updated with all changes and bug fixes done in LCA for Experts.

EPD Generator

LCA Calculator can generate an Environmental Product Declaration (EPD) as a zip file in ILCD+EPD format with the same capabilities as in LCA for Experts. With the EPD generator tool, you can:

- Import data into an i-report
- Update parameters in an i-report
- Compile the LCA data in EPD format
- Download a zip file in ILCD+EPD format

Note: The new functionality is unblocked upon request.

Note: It only produces valid ILCD+EPD files, if the underlying LCA model/report is fully compliant with EPD modelling guidelines and EPD standards.
